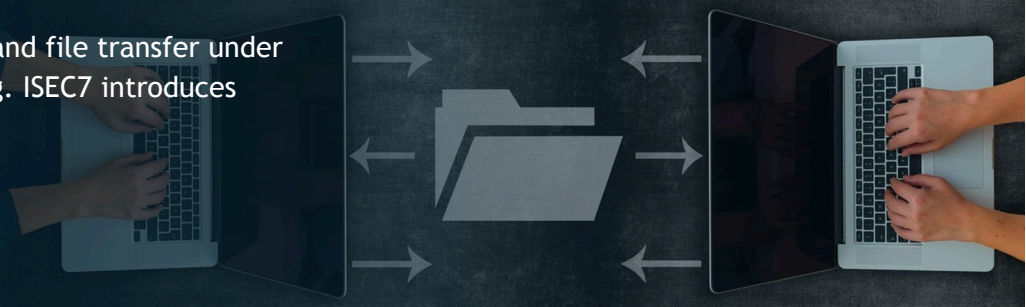
ISEC7 THE DIGITAL WORKPLACE COMPANY | Kiteworks

SECURE FILE EXCHANGE WITH KITEWORKS

Know who received which file, and when.

Kiteworks brings email, file sharing and file transfer under shared policies and a single audit log. ISEC7 introduces the platform and runs it for you.



One audit log
for email, file sharing, MFT, SFTP, web forms and APIs

Your keys
the encryption keys stay with the customer

Your deployment
on premises, private cloud or hosted, also without a network connection

Run by ISEC7
from procurement to managed operation

CHALLENGE

Drawings, specifications and contract data leave the organization every day: as an email attachment, through a file share, by SFTP. Each channel has its own rules and its own log, if it has one at all. When an auditor or a customer asks who had access to a file, the answer has to be pieced together.

Article 21(2) of NIS2 requires measures for supply chain security, encryption and secured communication.

CAPABILITIES

Kiteworks calls its platform a Private Data Network: all exchange channels run under the same access rules and write to the same audit log. Instead of attaching a file, you share it through the platform, with an expiry date and a second factor for external users.

THE SOLUTION & USP

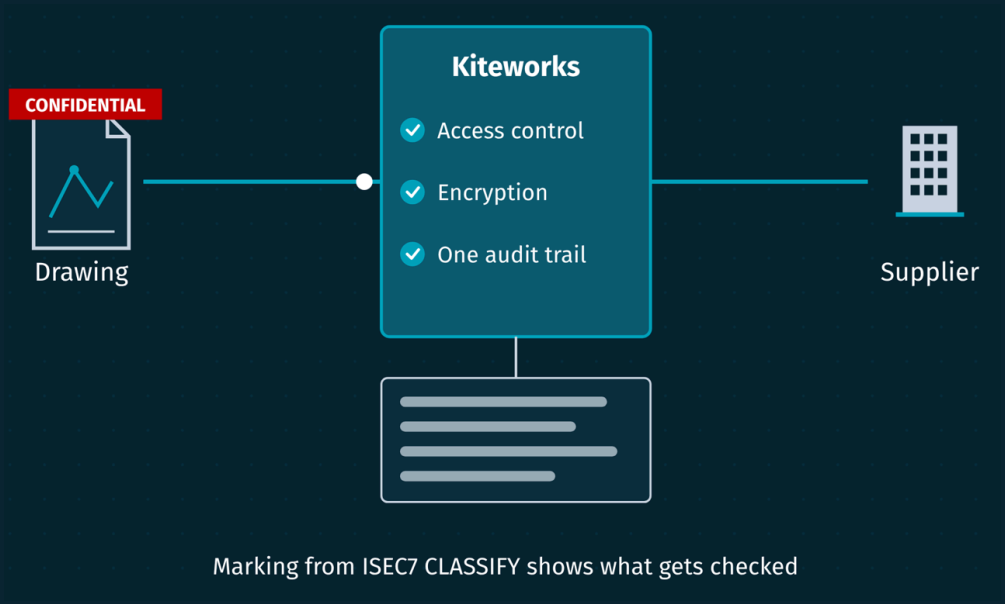
- One set of policies for email, file sharing, managed file transfer, SFTP, web forms and APIs
- Central audit log that cannot be altered, with CISO dashboard, activity reports and CSV export
- Expiry date and download notification per message, second factor for external users
- Safe Edit: the file stays on the platform, the recipient works on it there, with watermark and versioning
- Hardened virtual appliance in single-tenant operation
- Data rooms with client-side encryption from Dracoon, a Kiteworks company

WHAT ISEC7 DOES

ISEC7 is a Kiteworks partner and takes care of procurement, integration and configuration, support, customization through scripting and operation as a managed service.

Since 2003, the ISEC7 Group has run Digital Workplace and Managed Mobility Services for public authorities, international enterprises, operators of critical infrastructure (KRITIS), companies that handle classified information and other organizations with strict compliance requirements. Over 700 customers worldwide, among them governments, police forces and armed forces. ISEC7 is headquartered in Germany, with locations in the USA, Australia, New Zealand and Poland.

ISEC7 THE DIGITAL WORKPLACE COMPANY | Kiteworks



TARGET GROUP

- Operators of critical infrastructure and public administration
- Industry, automotive, legal, finance and healthcare
- Defence suppliers preparing for CMMC 2.0
- Departments such as management, HR, controlling and purchasing

AREAS OF APPLICATION

- Exchange of confidential files with suppliers, customers and partners
- Large files that do not fit into an email
- Data rooms for M&A, HR, legal and management
- Secure portals for customers and partners under your own brand
- Automated file transfer between systems

CLASSIFY FIRST, THEN SHARE

A marking from ISEC7 CLASSIFY shows which data needs protection. Kiteworks can apply its rules to exactly that data.
